Smartfloor Revolution - Possibilities

- 1 The minimum possible rail length is 1 meter.
- 2 Rail has a minimal offset distance of 50mm to the back of the floor.
- 3 Rail has a minimal offset distance of 50mm to the front of the floor.
- 4 Rail has a minimal distance of 42,5mm from center Rail to wheelarch contour.
- 5 The minimal center to center distance between rails is 85mm (156mm for mounting seats).
- 6 Alu profiles are always positioned in the travel direction.
- 7 The SF Revo floor-sheet must be installed over the entire width and length of the vehicle floor.

ATTENTION:

- For the Smartseat Flip-Up use 156mm rail distance Single Seatleg
- Only use a maximum of two Sliding Rotating V-legs on one seat row.
- An unique alu mounting strips kit must be used.
- Use Lock Plates for mounting when using our standard seats and legs. It is allowed to use our U-profile instead of Lock Plates.
- It is allowed to mount the Smartseats in the opposite travel direction, without the use of Lock Plates at the front side of the floor.
